Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets. I have been an opponent of Monsanto and its genetic engineering for the past decade and I am truly appalled at the lack of discretion and research in their ability to roll products out into the market that are potentially very harmful to us and the environment. We need full and comprehensive studies initiated before any of these products are unleashed on the public!

Thank you for giving me the opportunity to comment.

Sincerely,

Mary Schneider
