Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets.

I am very concerned about the "revolving door" of personnel between corporate lobbyists and government regulators. How can they be really doing what they are supposed to be doing when they have these kinds of conflicts of interest.

I am also very concerned about the degradation to the environment as well as our health because of the use of toxic pesticides and other foreign substances such as genetically modified foods which have NEVER been adequately tested for long term effects on human beings or the environment.

There are many other issues involved in corporate control of our food, but these are some of the most egregious ones.
Thank you for giving me the opportunity to comment.

Sincerely,

Susanne Griffin
