US Department of Justice

Dear US Department of Justice:

Dear US Department of Justice,

For the health of our planet and the health of its inhabitants please stop Monsanto from having control over seeds. Monsanto's control over our food is limiting our access to healthy food. They are destroying biodiversity. Their genetically engineered crops have not been proven safe by independent scientists. Their crops cross-pollinate with organically grown varieties and destroy those crops. This is an outrage. They must be stopped or we will have a huge food shortage on this planet with millions of people dying of malnutrition and diseases caused by their genetically altered "food". I want to know that the produce that I buy in the grocery store is not a genetically engineered crop. I want to know that if I plant my own seeds that the crops that I harvest have not been pollinated by Monsanto's genetically engineered crops. Since I have learned of GMO's, I now understand why my body no longer digests soy and corn. Instead I become sick after eating those foods. Please stop Monsanto from destroying our healthy food.

Sincerely,

Brenda Dyson
