Subject: consumer input

Hello,

This is my input on the future of US agricultural policies.

These are my priorities:

- 1--Ban the sale of all GMO and nanotech items until they are proven safe for humans and other life-forms.
- 2--Institute testing of health effects of GMO and nanotech items on humans (don't test on humans, do the studies in vitro).
- 3--Promote small family farms instead of subsidizing big business.
- 4--Promote sustainable agriculture instead of increasing our reliance on artificial additives and amendments.
- 5--Greatly increase testing and sampling of imported food items.

Thank you,

Rich Moser
