Subject: Concentration in the food industry

Dear DOJ,

I am deeply concerned about the many negative effects of high-levels of concentration in the food sector. It seems that every good effort made to create a healthier, more humane, and environmentally responsible food system is undermined by the fact that a few companies control most of the marketing, processing, and distribution of everything we eat. Action to break up uncompetitive oligopolies is long overdue. Please take action soon!

Sincerely,

Aaron Bobrow-Strain
