Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets.

One company, Monsanto, controls the majority of seeds in the US, and regularly threatens farmers who don't buy its seeds.

Why aren't the Sherman Act laws enforced.

The non-action by my government causes me to believe that Monsanto has friends in government who are only interested in the perks you earn when you go to bed with these criminals. What does that make you?

Our government obviously supports food grown and raised in ways that are terrible for the environment, with methods that pollute the water, poison the soil, and threaten our long-term food security. Is your family immune to such an environment?

No wonder Copenhagen was a FAILURE.

The whole world is watching the corrupt U.S. become a weak bully propped up by its threats to other nations who don't play games.

All Power is Illusory. Unplug your egos and Evolve

Sincerely,
Robert Lassiter and Family
