Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets.

Just one company, Monsanto, controls the majority of seeds in the US, and regularly threatens farmers who don't buy its seeds.

Food is grown and raised in ways that are terrible for the environment, with methods that pollute the water, poison the soil, and threaten our long-term food security.

What's in our food, anyway? And why aren't there decent labels telling you where it grew, what chemicals are on it, and if it's genetically modified?

Thank you for giving me the opportunity to comment.

Sincerely,

REV. JEFFREY EARL WOMBLE
