Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets.

I am particularly concerned about the long term effects of our current ways of producing food. I don't believe large scale pesticide driven agriculture controlled by the few benefits the many. Pesticide use has created an epidemic of cancers and a major decline in human health. I believe Monsanto has far too much control over the seed market and that we should encourage seed diversity. It cannot be good in the future to have eliminated many varieties of seeds and many sources of seeds. I think we will be shocked at our short sightedness 50 years from now.

Thank you for giving me the opportunity to comment.

Sincerely,

Louise Wolf
