**Subject:** Kidding & NOT FUNNY

---

I write at the urging of Slow Food USA concerning a current DOJ study "looking at how big business controls food and farming.'

You've got to be kidding! The legacy reason and tightening-noose is the Federal government's active complicity, through totally compromised legislation 'purchased from a Corrupt Congress' by the venal commercial agri-business 'sickness and death' industry.

**Place people's health first. Therefore, the current agri-business system must be legislatively destroyed. Enforce the damn environmental and water quality on the books now. Have you noticed the chemicalized and then 'missing' top soil? Oh, there's not sufficient clean water...geez have you ever heard about feedlot run-off?**

Here's another tid bit from Slow Food's email to its followers: "The DoJ is seeking stories about how corporate control of the food system affects average citizens. If you're concerned that just a few big businesses have so much power over where your food comes from and how it's produced, tell your government. Your comments will help to inform a series of DoJ workshops on these issues in 2010."

**The Affects on Average Citizens – #1: They are sick and dying as a direct result of the agri-business poisoning system. Connect the dots, you morons, between HEALTH CARE REFORM and the agri-business death merchants provided adulterated food that causes degenerative diseases that drive our broken medical system. Finally, don't insult our intelligence and waste money conducting workshops in 2010. Do your jobs now. Begin enforcing all laws on the books.**
