Subject: Food security

I am a concerned senior citizen who is very worried over the corporate take over of our food system. Factory farms can not ever make our food safe & secure. When such large quantities are grow & packed there can be no assurance of purity or quality. Foods are grow with chemical fertilizers & excess water to force them to market without the usual nutrients & vitamins. Food is shipped long distances using large quantities of energy. Profits go to corporations rather than farmers. Corporation have no alegiance to the land & only care about profits. Please insure that our food supply is managed for the health of the consumers & the land which supports us all.

Sincerely

Don Smith
