Subject: Agriculture: Food Labeling and Farmer's Rights

I am writing because I am concerned about the lack of competition in agricultural markets.

Just one company, Monsanto, controls the majority of seeds in the US, and regularly threatens farmers who don't buy its seeds. The fact that they own the worlds seeds and have genetically modified them with results that state that they are carcinogenic is very disturbing. Please fight to make our food safe by labeling genetically modified food and we should support farmers rights to save their seeds and not allow Monsanto to sue them for cross pollination accidents.

Thank you for giving me the opportunity to comment.

Sincerely,

Kelley McNamara
