Subject: Crappy Food!

Dear Dept. of Justice: I have to grow my own food to know what I am putting into my and my family's bodies. Corporate food is a disgrace. Our tax funded subsidies and other economic benefits to the food industrialist need to change to help level the playing field in the food market. The current system rewards those who produce less healthy food and penalizes those attempting to grow healthy food. The fee charged to be labeled "organic" is prohibitive fo small farmers, yet our tax funded subsidies and other economic benefits to the food industrialist are huge. I am sick of it and am trying not to get sick because of it!
