Subject: Comments

I am most concerned about the amount of chemicle poured on our foods and in the enviornment, by mege chemicle companies telling farmers how to farm... Now they are modifying the seeds also....Our Foods are not Safe, and Monsanto cares only of profit and not what is best for everyone at stake here...

I just moved away from a farm, because it was like living in a chemicle zone, always in the air to some degree...I sarterd having this cough each year through spraying season, and then it got worse, and I lost 2 dogs to cancer while living there...it was not a wholesome atmosphere like it should be....

And with your help we can make it better for all involved!

Thank you for giving me the oppportunity to comment.

Sincerely, LuAnn Ferguson
