Subject: Food Crisis

I live in an agriculture area and my 3 year old son goes to a state funded preschool where they feed him the bottom of the barrel foods. I want him to be able to eat healthy and to eat local foods! We need to model healthier behaviors for our children so they can grow to be strong minded individuals. I wouldn't eat the crap they feed my child. MOST people would not eat what they are feeding the children. Please take everyone into consideration when it comes to food. We have the resources, make it easier for our nation to eat, rather than depriving because of corporate desires.
