To Who It May Concern,

I am deeply concerned with the fact that corporations have taken over the control of our farms and our farmers rights to grow the food they wish. I am disgusted that there are laws that prohibit people for making comments against the meat industry. I am deeply concerned with bacteria that is found in mass produced meats and the spread of gmo foods. I feel that farmers deserve more rights and that healthy food should be more affordable in this age of obesity and diabetes.
