Subject: local hearings and investigations

I understand you are inquiring about public concern regarding our food sources and the companies responsible for them. Thank you for seeking public input.

I would like to urge you to take action in the areas of concerns below:

- 1) food regulation enforcement of safety standards
- 2) ethical treatment of animals while they are prepared for market

I ask that you conduct some in depth research in these areas and identify some needed responses.

Thank you for your consideration of my concerns

Sincerely
Eve Sandberg,
Ohio
