At the very least----please delay any decision concerning Monsanto, antitrust or genetically engineered seed and food, until there is an abundance of BALANCED research and information as to what genetically engineered food is and what it does to our national and global economy, our health and our future.

Please respect the opinions of the people you represent and make a educated and conscientious decision rather than a seemingly rushed decision. This is a very big decision that will affect the future of the world, please treat it that way!
