---

I know this is late

but I would like my voice heard. Monsanto's control of the seed industry is horrendous and if we have any hope for the future, in this environmentally insecure time, its control needs to be dismantled. How has our world gotten to a place where farmers, those who feed us, sustain us, are so mistreated (you must know the stories behind this comment). Please I ask you to think very carefully about what sort of world we want to build in the next decade when you make this decision. thank you.

sincerely,

Hannah Kullberg
