US Department of Justice

Dear US Department of Justice:

"Then GOD said, "I give you every seed-bearing plant on the face of the whole earth and every tree that has fruit with seed in it. They will be yours for food." Gen 1:29

GOD has given us choices for natural food on earth. The food belongs to ALL OF US. No one person/company should be able to own our food.

We are to leave this earth better than it was when we entered it.. We lived with free choices.. is it right to take that away from future generations?

Sincerely,

Jenysha C Polk
