"It's not nice to mess with Mother Nature." This was an ad from my childhood. I thought it was funny then. I take it very seriously now.

We all need to eat. We need to be nourished by the foods we take into our bodies. It would be a blessing if those foods were pure, wholesome and unadulterated.

The more I read about Frankenfoods, the more appalled I become. Local formers and organic farmers are being driven out by the Monsanto bullies. STOP IT NOW!

Monsanto has an agenda that has nothing to do with robust health and wholesome nourishment. It is my right to have a choice about what I eat. If Monsanto has it's way, there will be no choice--not for me or for you or for anyone. STOP THE MADNESS NOW!

Unflinchingly yours,,

Lael Jackson
