Subject: Comments

I was completely unaware, as I feel most Americans are of the health hazards created by corporations such as Monsanto. It is unconstitutional to threaten farmers and drive them out of the market because of this corporate bully. Please regulate Monsanto and put them in their place. I watched the film,

Food, inc. and I am terribly sad that Greed has taken over our entire food production industry, at the expense of our values, nature itself, and the farmers, who do not have any support against this megomenical giant. Please- You can do something for us. You hold the power. We need labels telling us about genetically modified food, and in the case of Monstanto, putting the bully away so that farmers (and the American consumer)can have a choice. Choice is what is lacking at this point in the Food industries. For our safety, the enviornment, and our children-help to stop these companies from running riot as they have up to this point.

Sincerely,
Ms. Garrett McConnell
