As a citizen of America, I want the right to have control over what I put in my mouth. How can we have objective oversight of the international conglomerate food industries when the people making the federal decision are the same people who run the companies? How can I be confident that what I buy in the stores are safe when there is such an air of secrecy and conspiracy that is the basis of the corporate food industry. You work for us, let us choose what we feed ourselves. Give us the tools to make INFORMED DECISIONS (ie- transparency).
