US Department of Justice

Dear US Department of Justice:

If I could have just one wish it would be to wipe Monsanto off the face of the earth --unless it commits to Truth and caring for the well-being of all people. It is so imbedded in our Department of Agriculture that all opposition is silenced by their power. It is even a threat to peace with other nations because of the havoc their products can cause for farmers everywhere. Their power and greed is insatiable. A return to organic methods is necessary for the health of all people as well as for the health of the earth itself. It would take a book to cite all their injustices, but this is all I have time for now.

Sincerely,

Eunice Messner
