---

I am writing because I am concerned about the lack of competition in agricultural markets. It's not just competition but the intentional poisoning of people that is aggravating. Why do we keep up the charade of pretending to find a cure for cancer when carcinogens are blatantly put in food in order to cause cancer so the medical and drug companies can make a fortune on suffering and death? Prove me wrong, I dare you.

Thank you for giving me the opportunity to comment.

Sincerely,

Alexander Houghton
