US Department of Justice

Dear US Department of Justice:

I am greatly concerned for myself, my children, my children's children, and their children's health due to the contamination of our food supply.

What ever happened to heirloom seeds that formed resistance to pests and diseases over time? Why must we the people be forced to eat frankenfood?

It doesn't take a genius to reason that if GE foods fed to rats are causing toxicity in all major organs after 90 days, it can't be very life sustaining for people. That is the point of food right?

I, as an American citizen do not feel like the government is looking out for "we the people" by allowing this GE Food to be planted, grown, and silently stocked upon our food store shelves; for our consumption. We the people have a right to know what is in our food that includes what scientists have done to the very seeds that this food is grown from. Specific labeling is very important to me as a parent, so I can choose that which is life preserving to feed to my children.

Growing these GE so called foods endangers conventionally grown and organically grown foods. Due to cross pollination; perhaps these frankenfoods should be grown in a bio dome until sufficient testing is done on them. So we don't loose the precious seeds we have left.

Where are the politicians who look out for the good of the people to preserve the nation? Monsanto is the Devil, and has proved his evil design over and over again. While the innocent farmers and unknowing public pays the price.

Please Stop the allowing of GE crops to be planted, lets fight this beast.  
Vote against the allowing of GE alfalfa to be planted in the USA.

Sincerely,

Merisa Workman
