Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets.

A single company--Monsanto--controls the majority of seeds in the US. Moreover, evidence indicates that they threaten and harass farmers who don't buy its seeds. Their GMO seeds pollute the crops of non-Monsanto-using farmers. Because these GMO seeds are patented, Monsanto can even threaten farmers who never wanted to have anything to do with Monsanto.

Thank you for giving me the opportunity to comment.

Sincerely,
Keith M Ericson
