Subject: amazon, the govt and us readers and writers

We need a healthy, competitive book market. It is vital to our culture and our country's future. It's not in the public interest for the government to help Amazon use e-books to target traditional brick-and-mortar bookstores. NOR, even more importantly is it in anyone's interest that Amazon become the sole purveyor and "producer" of knowledge in our country. Because that is precisely what will happen when ONLY Amazon sells and produces books. Sincerely yours, Eunice Lipton, writer and reader
