I urge rejection of the proposed DOJ settlement that would allow Amazon to resume its predatory pricing practices.

While I support Amazon's right to conduct business, I reject its right to use its massive organization to prevent others from doing so. Amazon is already approaching a monopolistic hold over book selling, and this settlement would give them carte blanche to move even further in this direction.

Amazon does not need the help this settlement would provide, and giving it to them will damage free enterprise. This would be not only unfair. It would be un-American.
