Subject: Amazon

Dear John Read,

I understand the Justice Department has proposed an e-book settlement. As an author and avid reader, I would like to comment that having a healthy, competitive book market is crucial and vital to our culture. I believe that the government helping Amazon use e-books to target traditional bookstores (of which, sadly, we've already lost too many in our communities) is not in the public interest.

Thank you for your consideration,
Mirka Knaster
