**Subject:** Patent litigation law

Good afternoon:

I ask the FTC to assist in changing the present patent litigation laws. It concerns me when I hear that Patent Assertion Entities are strictly in the business of buying patents for lawsuits against business with very dubious ties to the patents. I have heard of businesses that receive demand letters for patent infringement for offering Wi Fi to their guests. In fact one PAE has targeted 13,000 cafes and motels for alleged Wi FI infringement. If we don't stop this nonsense now, someday those could be businesses here in South Padre Island.

No business should ever be put in this situation. Please help to update the patent litigation laws.
