

I am specifically interested in knowing how Amazon's Prime membership will be addressed in this discussion. I have used it for my business and for our family's homeschool for years now. It has been a big help to us financially and logistically ... saving us time, money and gas for research we used to do going from store to store. AND the included movies, shows and documentaries plus kindle book loan programs help me with business research and help our kids with their educational assignments. There are other benefits, also, but these are the main ones that I wanted to note here. I hope that this discussion leads to insights to help more companies provide similar types of membership programs that are as helpful as this one has been for us.

Sincerely,

Donna Marie Johnson, CEO and Marketing and Graphics Strategist
