Subject: Cabell County E-911 Emergency Response Center COPS Technology Application

This is the follow-up email to our discussion last week regarding the 911 center in Cabell County and a change to their proposed project in their application. I am writing to you both in support of the Cabell Co. 911 Center's Application for the \$1.4 million secured for them by Congressman Rahall in the FY2009 Omnibus Appropriations Bill.

The Congressman is supportive of the 911 Center's proposal change that will allow the \$1.4 million to go towards technology purchases for their Mobile Command and 911 Backup Center. This center will serve as an Incident Command Center and Emergency Operations Center to the 911 Emergency Response Center for the first responders in the area.

If there is anything else you need from the Congressman's office in support of the Cabell County

E-911 Emergency Response Center's application, please let me know. Thank you.
