

Tom:

A long time ago I started becoming worried about Petters Company, Inc. And working with Bob we've talked a lot about the stuff we do for Petters Company Inc. and you. Five years ago I was scared and worried about it and figured; yes I may go prison for a couple months. But you always promised us that we would find a way out of it. And yes I believed you.

About 3 years ago I started becoming very worried about Petters Company, Inc. and Bob and I talked more about going to prison and everything we are facing. Wondering if it would be now 5 years or maybe I would get off with only 2 to 3 years. But you always promised us that we would find a way out of it. And yes I believed you.

Last year I started becoming very very worried about Petters Company, Inc. and Bob and I talked more and more about going to prison and what's in it for us. Is the stuff we're doing for everyone else worth it or not. Is it time just to give up and hope for the best? Should we change our names and run from everyone, should we go talk to an attorney and see if there's anything we can do to help us out or just keep doing what where doing and hope for the best, because now we're looking at 20 years plus in prison.

Now it's nonstop that I think about going to prison and wondering if I wouldn't be better off throwing in the towel and just getting it over with. And most of the time I do believe I would be better off giving up for the following reasons.

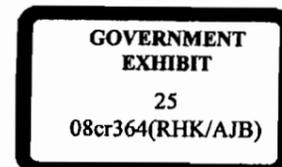

Petters Company spends money as if it grows on trees. Everyday I wire funds to one company or another, may be PCB, Petters Group, Celine Countryman, Sal Gal, etc. and every single company is loosing money. EVERYONE! We have a suite at Target, Excel and Metro Dome. We spend thousands of dollars getting a group of managers and their families together for a 4 day get together. We spend thousands of dollars at Trade Shows trying to out do other companies twice that size of us. Companies that are actually making money don't have/do what we have.

Mike O'Shaughnessy is going to bring down all the companies before we even have a chance to get out. HUGE law suite waiting the way he treats employees, he has no values and no respect for people and especially women. And you have Mike so high on the pestle that no one can even talk to you about him. It has gotten to the point that Mike controls you. You worship Mike as if he's God. Mike's a good sales person, shitty manager – he's nothing but a salesperson!

Tom, at least once a week an employee or a friend asks me how Petters Company can actually keep funding and giving money away when all the companies, except for Petters Company and Ubid is loosing money. However, they have no clue about Petters Company.

I've lost trust in you, I'm afraid to tell you anything, if I do you go to that person and tell them not to tell me anything and now I can't even e mail you without out you sending

them to others.

It's been month's since we've actually talked about Petters Company or gotten together to go over things. You want nothing to do with Petters Company and avoid it as much as possible. It's as if we only need 4 employees here, Mike, Larry, Randy and yourself.

Tom, after saying all of that I honesty only see us getting further and further in debt and see no way out. I know you have some things in the works, but I don't see or hear about half of them and all I see is a black hole at the end of the tunnel. Bob and I sit back in our office's making up stuff day after day and we're not involved in anything else. However the financial statement from all the companies tells us how there doing and it's not good.

You always say I have a good perspective on people and believe Mike nothing what you think he is.

Deanna Munson
