¹ Total generated gross receipts are disbursed into two categories: distributions, and fees and costs. Due to data entry and rounding errors, these disbursements do not equal to the total receipts resulting in an absolute difference of 1,093.41. There are 96 cases with data entry errors that account for over 99% of this difference.

² Percent of the total receipts paid to a subcategory

³ Count represents the number of cases that funds disbursed to the corresponding category

⁴ Percent of cases that had funds disbursed to the corresponding subcategory

⁵ Funds disbursed can be as low \$.01 for some cases; rounding these figures causes the minimum to be zero.
