

## **May 31, 2023 – Status Update - Status Hearing**

A Status Hearing in front of Judge Dabney L. Friedrich was held May 31, 2023.

At the hearing, the parties updated the court regarding the state of discovery. The government stated it transferred Production 2 to the defense and was working on getting more materials from Scotland and various countries. The defense indicated it had received the discovery and was reviewing it.

The government requested a further status hearing, following a written joint update to the Court, and the defense agreed. Judge Friedrich granted the government's request and ordered the parties to file a joint discovery update on or before October 1, 2023, after which the next status hearing will be set.

Additionally, the Judge acknowledged the victims who attended the hearing and restated her position that she believes she does not have the legal authority to allow a victim dial-in telephone line to listen to the live court proceedings. Therefore, please note that there will not be a dial-in telephone line for the victims or the public at future proceedings.
