It's OK to ship with no names.....but we still need to try to acquire names for each one if we can.....

Barry

The account above has been ordering since 2007 and currently orders between \$ 2400 and \$ 3600 per month in steroids. They have never provided patient names. The lab has asked me to address the issue with them and the nurse cannot get the doctors ok to provide names. Can you waive patient names for this acct?

Mario
