The problem is that a lot of this stuff is in a gray area + unwritten rules.....we need to make best guess at times

Subject: Ca?

The problem is that we live in MA and our primary lic is in MA.we need to attempt to comply with each states regs always leaning towards keeping MA happy. Even though we are dispensing for office use, some prescriber must give us the ability to do so.....a pharmacy, pharmacist ..does not have the legal authority to prescribe. We are still a pharmacy + must not appear to do business as a MFG would.
