

# TRAINING OPPORTUNITY

- WHO:** Lifeline Critical Infrastructure IT Personnel (Water, Energy, Communications, Transportation, Emergency Services)
- WHAT:** Training - SANS ICS410: ICS/SCADA Security Essentials
- WHEN:** February 12-16, 2018
- WHERE:** Jacksonville, FL FDLE Training Facility or SANS Simulcast
- WHY:** To improve Florida's critical infrastructure cybersecurity posture against information technology threats and cyberterrorism

**APPLY:** **Class Information:** <https://www.sans.org/partnership/events>  
To register for a **NO-COST** seat please contact your local FDLE RDSTF Planner  
The deadline to apply for this program is **January 10, 2018**.  
Seating is limited, potential candidates are encouraged to apply as soon as possible.

**DETAILS:** The training is designed for, and available to, information technology security personnel throughout Florida who operate and/or manage industrial controls systems in their IT environment. There will be an emphasis on personnel in industries and agencies providing support to any of the five lifeline critical infrastructure sectors: energy, transportation, communications, water, and emergency services.

**Jacksonville location:** Instructor-led classroom training, with hands-on lab exercises

**SANS Simulcast:** Participate with the live, instructor led class in real time remotely from a location of your choosing. Read more about it here: <https://www.sans.org/simulcast>

**SYLLABUS:**

- ICS410.1** – ICS Overview
- ICS410.2** – ICS Attack Surface
- ICS410.3** – Defending ICS Servers and Workstations
- ICS410.4** – Defending ICS Networks and Devices
- ICS410.5** – ICS Security Governance
