

ADVANCED TRAINING OPPORTUNITY

Force Science Training Course

May 2-3, 2018 from 8:30 a.m. - 4:30 p.m.

Keiser University | 5002 West Waters Avenue | Tampa, Florida 33634

sponsored and funded by: Tampa Bay Area Chiefs of Police Association

Are you prepared to effectively manage the firestorm from a controversial use of force case?

“Force Science is right on target! I was a chief for 20 years, and this is some of the most incredible information I’ve ever seen. I recently retired, but my training staff continues to use your material all the time.”

- Chief Ron Louie (ret.), Hillsboro, OR PD

Now! Law enforcement’s most ground-breaking training course prepares you for uncovering the truth when lawsuits, careers and reputations are on the line!

Dr. Bill Lewinski and his team of researchers and experts on human dynamics will teach you:

- How to analyze vital elements of controversial uses of force that are often overlooked.
- Skills to help determine whether an officer is being honest when they swear their recollection of an incident is true...even though their account conflicts with evidence.
- Techniques for helping officers accurately & thoroughly recall force incident details.
- Why a site visit and/or video review may or may not be advisable before a statement.
- Whether shots to the back really reflect what an officer saw when they pulled the trigger.
- How to avoid critical mistakes some investigators make during post-incident interviews.
- The truth about time: How long it really takes officers to start—and stop—shooting.
- What ready position is really best for reducing lag time...and much more!

Seating is limited!
