Elder Protection Team
Toolkit
Available at:
https://www.nieji.org/tribal-elder-protection-team
Introduction to Tribal Elder Protection Teams

The Tribal Elder Protection Team (EPT) also commonly referred to as a Multidisciplinary Team (MDT) is a group of professionals, the elder, family members, and community members from diverse disciplines. The team provides comprehensive assessment and consultation in addressing elder abuse concerns. The EPT provides assistance to their clients to promote coordination among service programs available to elders. Improve lines of communication to efficiently address elder abuse, neglect, and exploitation. The EPT will increase relationships between tribal public service agencies while maintaining client confidentiality. Various professional disciplines are represented on the EPT. Membership is limited and is not open to all service providers, or members of the public. The Tribal Elder Protection Team Toolkit will define the roles and responsibilities of the EPT members.

* EPT and MDT may be used interchangeably in various sections of the toolkit, as different tribes may refer to their teams as one or the other. The EPT may be as diverse as their communities in which they serve.

* Involving the elders as the central focus of the group is specific to Native American Elder Protection Teams as some non-Native teams do not include elders in the conversation.

What is an Elder Protection Team?

One of the most successful models for addressing elder abuse in Indian Country is utilized by the Confederated Tribes of Warm Springs (CTWS) in Oregon. The CTWS-MDT representatives have served their tribal community since 1999 through a multidisciplinary team approach. This MDT provides assistance to their clients when coordinating with social service programs, health systems, and legal proceedings. The CTWS-MDT coordinates documentation, and evidence gathering efforts for legal procedures (civil and criminal cases), and assists in community crime prevention efforts.1

The CTWS-MDT members include representatives from: The Senior Wellness Center, Tribal Police, Tribal Prosecutor’s Office, BIA/Tribal Social Services, Tribal Housing Authority, Indian Health Service (IHS), Community Health Representatives (CHR), Victims of Crimes Office, Assisted Living, and the Oregon Adult Protective Services.1

Why create an Elder Protection Team?

• To reduce stereotypes around elder abuse
• To address a lack of standardized protocols which may limit resources available to elders
• To improve appropriate responses to elder abuse
• To improve communication and coordination among service agencies, thereby saving valuable time locating advocates and addressing safety concerns for the elder
• To improve elder abuse training for professionals, thereby gaining trust in providers, and better utilizing
• To reduce underreporting of elder abuse
  - In 2013, the Bureau of Indian Affairs reported that 1 in 23 cases of elder abuse were reported to any agency; only 1 in 44 cases of financial abuse were reported, and 1 in 57 cases of neglect.2

What to consider when creating an Elder Protection Team?

1. Defining the responsibilities and functions of the team such as:
   • How often meetings are held (e.g., monthly)
   • Location and time (e.g., Senior Center- meeting room at 6pm)
   • Who chairs meetings (e.g., senior wellness director, etc.)
   • Defining how client information will be recorded (e.g., each department will keep own records)
2. Defining criteria of membership and affiliation:
   • Requirements for meeting attendance (e.g., each department selects a representative)
   • Clearly agreed upon EPT protocols for addressing elder abuse
   • Limitations of report sharing (e.g., each member signs confidentiality agreement)
   • How confidentiality will be maintained

3. Defining purpose of the EPT meeting:
   • Case review (e.g., each department reports case status to team)
   • Intervention (e.g., coordination of resources by local senior/elder programs and other team members)
   • Prosecution (e.g., implementing Tribal Elder Abuse Code(s), roles of law enforcement and the court)
   • Prevention of elder abuse, neglect, and exploitation

4. Defining roles and responsibilities of members:
   • Define each team member’s role (e.g., response protocol and mandatory reporting)
   • Training needs and requirements
   • Identify relevant jurisdictional issues (e.g., PL-280 state, tribal, federal, etc.)

5. Defining community awareness and prevention procedures for example:
   • How will information be disseminated into the community? (e.g., holding press conferences, distributing informational pamphlets)
   • Community outreach activities to address awareness of elder abuse, development of an elder abuse support group or coalition, meeting your elderly neighbors, and initiating projects with local schools.

Elder Protection programs vary across Indian Country in terms of:
   • Available infrastructure including agencies and personnel responding to incidents
   • Jurisdictional considerations
   • Availability of traditional justice systems
   • Tribal and/or State civil or criminal courts

Services for Native Americans (OAA Title VI)

ACL funds programs that support American Indians, Alaska Natives and Native Americans in the areas of nutrition, supportive services for older adults, and caregiver services. The nutrition and supportive services grants include congregate and home-delivered meals, information and referral, transportation, personal care, chores, health promotion and disease prevention, and other supportive services. The caregiver services grants include assisting families in caring for older relatives with chronic illness or disability, and grandparents caring for grandchildren. There are other necessary services provided by ACL grants so the people we serve have meaningful support to help them live independently in their communities.

History of Title VI Programs

In 1978, the Older Americans Act was amended to include Title VI which established programs for the provision of nutrition and supportive services for Native Americans (American Indians, Alaska Natives and Native Hawaiians).

The program has since expanded to include caregiver support services. Eligible Tribal organizations receive grants in support of the delivery of home and community-based supportive services for their elders, including nutrition services and support for family and informal caregivers. The Authorizing Legislation comes from Sections 613, 623 and 631 of the Older Americans Act of 1965, as amended.

The Purpose of the Programs and How They Work

Services for Native Americans programs were first established in 1978 with the provision of nutrition and supportive services. In 2000, services expanded to include caregiver support services. Programs provide grants to eligible Tribal organizations to promote the delivery of home and community-based supportive services, including nutrition services and support for family and informal caregivers, to Native American, Alaskan Native, and Native Hawaiian elders. These programs, which help to reduce the need for costly institutional care and medical interventions, are responsive to the cultural diversity of Native American communities and represent an important part of the communities’ comprehensive services.

Criteria Used to Determine Eligibility for Grants

Formula grants for the Services for Native Americans programs are allocated to Tribal organizations based on their share of the American Indian, Alaskan Native, and Native Hawaiian population aged 60 and over in their services area. To be eligible for funding, Tribal organizations of federally-recognized Tribes must represent at least 50 Native American elders age 60 and over. There is no requirement for matching funds. Separate formula grant awards are made for nutrition and supportive services and caregiver support services.
