# Castor Beans

# Rosary Peas

# Extraction Equipment

Materials needed to extract ricin and abrin and manufacture drugs, including:

- Rock tumbler
- Laboratory equipment
- Chemicals

# Delivery Systems

## Projectile weapons

- Crossbow
- Throwing knives
- Swords

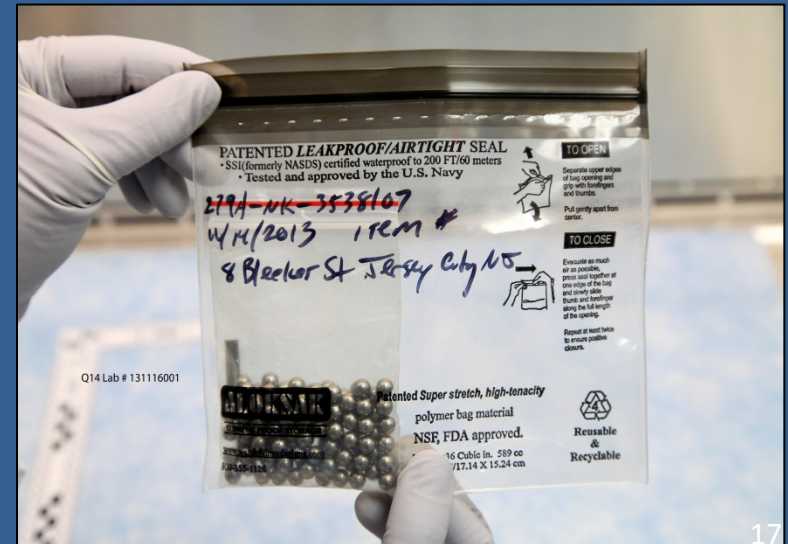

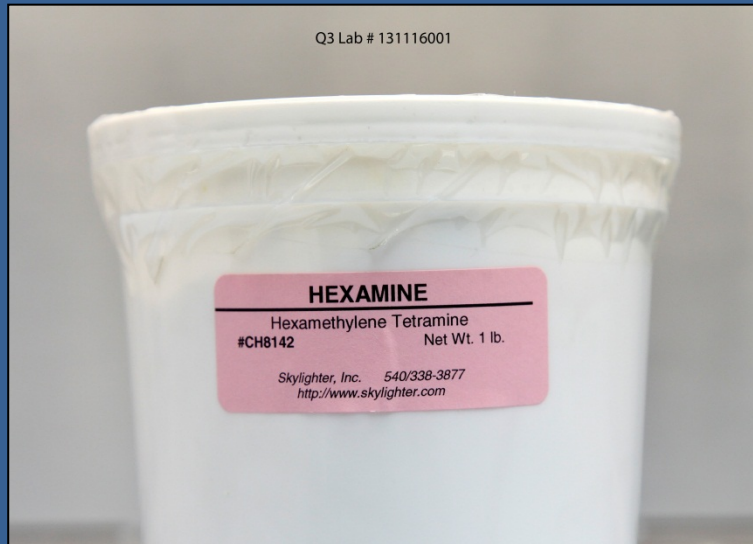

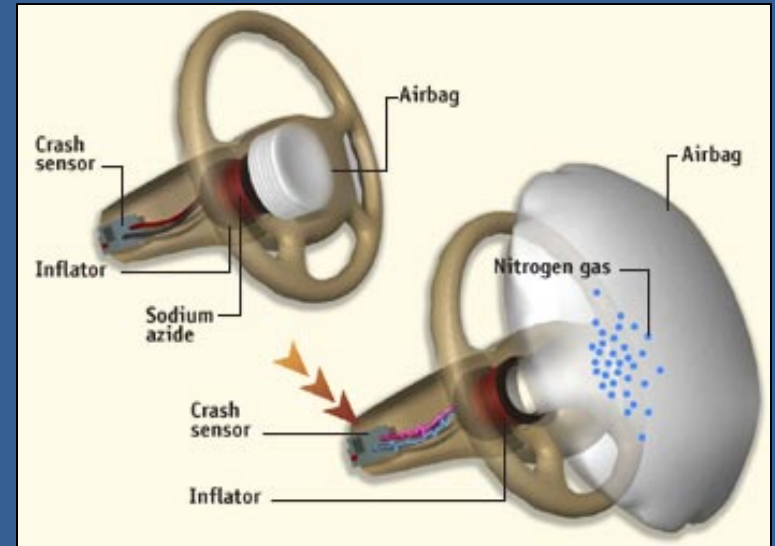

## Sprayer

## DMSO

# Explosive Precursors

- Sodium Azide
- Hexamine
- Potential shrapnel for IEDs

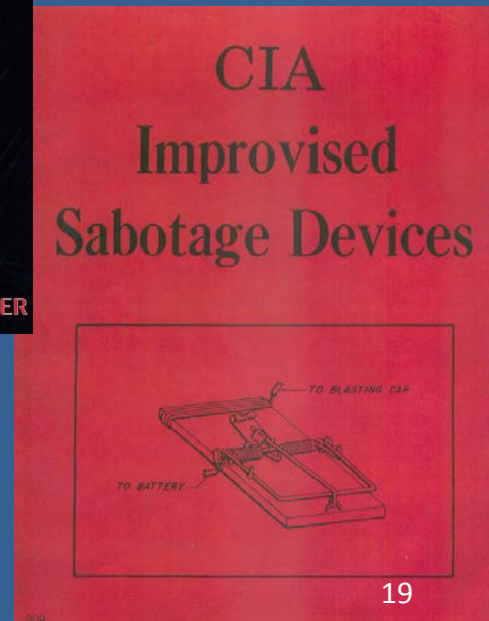

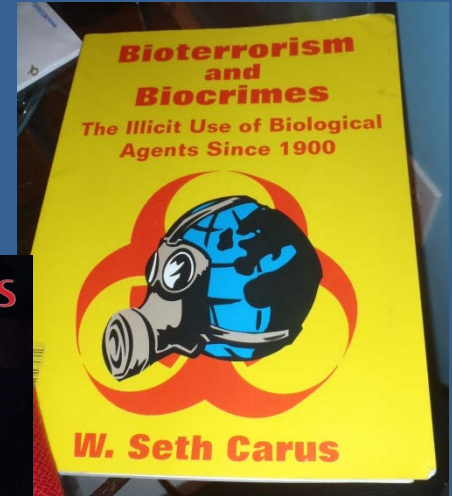

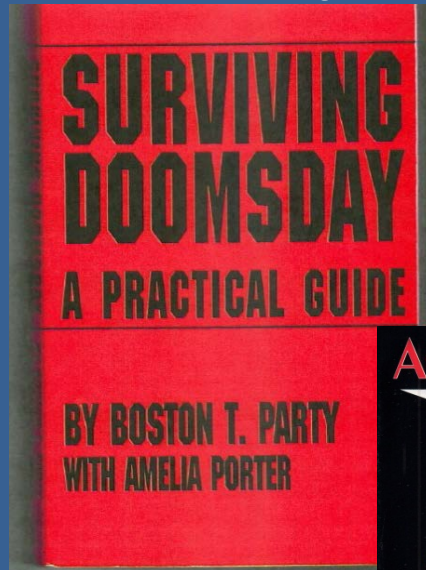

# Conventional Weapons

- Firearm and assault rifle parts
  - High capacity magazines
- Body Armor
- Ammunition

# Manuals/Guides

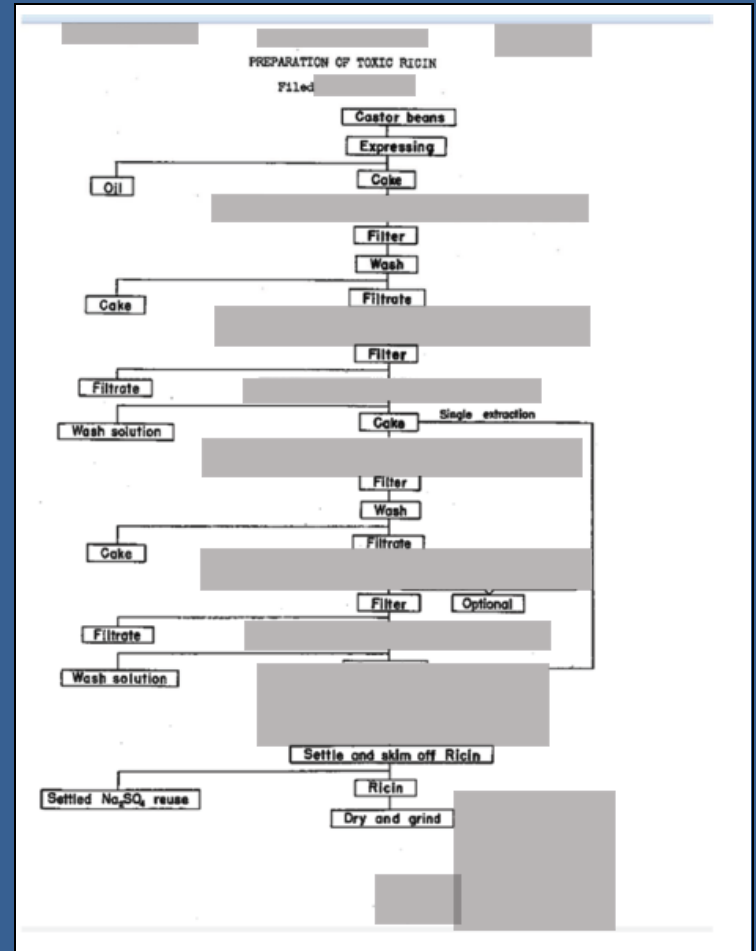

- Manuals/Books
  - Guides for ricin extraction
  - Illicit Use of Bio-Weapons
  - “Doomsday” preparation
  - Anarchist’s Cookbook
  - IED construction

# Ricin Extraction & Explosives Guides

- “Preparation of Toxic Ricin”  
(depicted in redacted form)
- Ricin Manual
  - “as close to a perfect poison as is available.”
  - “odorless, tasteless, undetectable, untreatable, and fatal in minute dose”
- RDX Manual
  - “much easier to make in the home than all other high explosives”

# Narcotics Recipe in Defendant's Handwriting

- Ether: (chemical  $(C_2H_5)_2O$ , with two Ethyl  $(C_2H_5)$ , at room temp ether is a liquid but is easily vaporizes and the vapour is the anaesthetic gas. Ether can be taken by mouth, unpleasant burning, nausea, belching. Ether vapour is inflammable mixed with air it can explode similar to alcohol.

- Shoe polish cooked up for its solvent.

- 1960, Fibres from the lining of barista skin were dried, rolled up in cigarette paper & smoked known as Mellow yellow.

- Potassium & sodium bromides are preferable to an opiate. They may advantageously be combined with Herbaria. In many intractable cases, the addition of chloral hydrate renders the remedy more effectual.

- GABA powder. - Weed dipped in Fry (embalming fluid)

- Ingredients in Meth include, ephedrine (Sulfadiazine), Fed phosphorus (Tip of Match stick), iodine, acetone, muriatic acid, Sulfuric acid, Lithium metal from batteries, and anhydrous ammonia (a fertilizer & refrigerant).
